

24-port switch with optical ports

Overview

Features 24 10G SFP+ optical ports and 2 100G QSFP28 ports, with all ports supporting wire-speed forwarding to meet high-density access requirements for 10GE servers. The DXS-3400 Series switches feature a modular fan and power supply design for a high availability architecture. Physical and virtual switch stacking allow the switches to be managed from. Cisco MDS 9124V 64-Gbps 24-Port Fibre Channel switch brings the latest high-performance, low-latency Fibre Channel Storage Area Network (SAN) technology to market. Along with the higher bandwidth, the Cisco MDS 9124V switch supports ease of configuration and management, detailed and in-depth. Offers large switching capacity, high-density 10G/40G wire-speed forwarding ports, and extensive Layer 3 functionality 1+1 power supply redundancy and 1+1 intelligent fans with automatic speed adjustment, support for over-current, over-voltage and over-heat protection, and non-intermittent power. S5860-24XB-U is FS-developed next-generation L3 multi-gigabit hybrid optical/electrical switch. This switch features 24x 100M/1000M/2.5G/5G/10GBase-T and 4x 1/10G SFP+ with 4x 10G/25G SFP28 uplinks. With wired and wireless convergence, it also complies with PoE++ standard. 24 auto-negotiating 10/100/1000 Mbps ports send data via Cat5e/6/6a/8 cable only to the computers, routers, hubs and other devices designated to receive it, which improves the efficiency and potential throughput. Power your business with a 24 port switch built for speed, stability, and scale.
