

810 Add optical module

Article Overview

To add an optical module to an 810 device, carefully handle the transceiver, insert it into the designated port, and follow proper cleaning and safety procedures to ensure optimal performance.

Step-by-Step Installation

- Prepare the Workspace and Tools
- Wear an ESD-preventative wrist strap connected to earth ground to avoid static damage.
- Ensure the area is clean and free of dust to prevent contamination of fiber-optic connectors .
- Gather necessary tools such as a Phillips screwdriver, hex key, and protective gloves if required for chassis access .
- Handle the Optical Module Safely
- Keep the transceiver disconnected from fiber-optic cables during installation to prevent damage .
- Avoid touching the optical connector ends; contamination can increase attenuation and reduce signal quality .
- Clean connectors using wet or dry cleaning techniques as appropriate for your environment .
- Insert the Optical Module
- Identify the correct port on the line card or chassis for the optical module .
- Gently slide the transceiver into the port until it clicks or is firmly seated. Do not force it....
