

A gigabit router is needed for a 100m mobile fiber optic connection

Overview

Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network Terminal. Upgrading to a Wi-Fi 6 or 6E router helps you get the full benefit of symmetrical fiber speeds. Fiber optic internet delivers symmetrical gigabit speeds directly to your home, but the moment that signal hits a budget router is where performance goes to die. You don't just need any router — you need hardware with multi-gig WAN ports, modern WiFi standards, and enough processor overhead to. You need a router that can actually process a full gigabit or multi-gig fiber line without creating a traffic jam, and this guide breaks down the best options across WiFi 6E and WiFi 7 hardware. WiFi standards also matter significantly, with WiFi 6 (802. 3Gbps and coverage of up to 2,500 sq.
