

Algerian AI Server Company

Article Overview

Algeria hosts several AI server and infrastructure companies, including Symloop, ALQAIS, and MAHLIATOV, offering cloud, on-premise, and high-performance computing solutions.

Key AI Infrastructure Companies

Symloop is a leading Algerian technology company specializing in AI infrastructure and MLOps. They provide end-to-end solutions for deploying machine learning models at scale, including GPU clusters, storage, networking, and orchestration layers. Symloop supports both startups and enterprises, helping them build production-grade AI systems while navigating compliance and cost considerations in Algeria . ALQAIS focuses on sovereign and decentralized AI, quantum computing, and high-performance computing. Their offerings include cloud-based services such as GPUaaS, AlaaS, QCaaS, and HPCaaS, as well as on-premise containerized data centers and specialized computational clusters. ALQAIS ensures full data sovereignty and compliance with Algerian law, making it suitable for organizations requiring secure, locally hosted AI infrastructure . MAHLIATOV CLOUD provides high-performance GPU servers, dedicated HPC infrastructure, and AI model deployment platforms. Their services support AI, big data, research, and generative AI applications, offering low-latency response times and integration with external tools via serverless functions. MAHLIATOV is particularly suited for universities, enterprises, and developers experimenting with AI models before scaling production .
