

Asian Lighting Distribution Box Specifications and Dimensions

Article Overview

Asian lighting distribution boxes typically support 50Hz, $\leq 500V$ circuits with up to 100A load, offering modular protection for residential and industrial applications.

Key Specifications

- **Voltage and Frequency:** Designed for circuits up to 500V and 50Hz, suitable for both single-phase and three-phase systems .
- **Current Rating:** Standard models handle loads up to 100A, providing protection against overload, leakage, and short circuits .
- **Protection Features:** Includes overload, short-circuit, and leakage protection, often with IP-rated enclosures (e.g., IP3X or higher) for safety .
- **Construction Material:** Typically made from 1.0mm thick steel plates with high-voltage electrostatic spraying for durability and aesthetic finish; some models use high-quality plastic for consumer units .
- **Design and Mounting:** Available in flush-mounted or surface-mounted configurations. Modular designs allow flexible combination of circuit breakers and busbars .
- **Busbar and Wiring:** Supports safe busbar connections and isolated neutral bars; some models include cement-spill protectors for industrial safety .
- **Applications:** Suitable for factories, residential buildings, shopping malls, and industrial sites, providing both power and lighting distribution .
