

Australian Long-Distance Optical Transceiver SFP

Article Overview

Long-distance SFP transceivers in Australia use single-mode fiber with LX, EX, ZX, or ER/LR variants, supporting distances from 10 km up to 80 km or more.

Overview of Long-Distance SFPs

Long-distance SFP (Small Form-factor Pluggable) modules are hot-swappable network transceivers that convert electrical signals from switches or routers into optical signals for transmission over fiber optic cables and vice versa (). These modules are designed for single-mode fiber (SMF) and are optimized for inter-building, campus, or metropolitan area network connections (). They typically use LC duplex connectors and operate at longer wavelengths (e.g., 1310nm, 1550nm) to achieve extended reach ().

Types and Distance Capabilities

Long-distance SFPs are categorized by their optical power and wavelength:

- LX SFP: Standard long-distance, up to ~10 km
- EX SFP: Extended reach, ~20 km
- ZX SFP: Extra-long reach, ~70-80 km
- ER/LR SFP: Enterprise/long reach, up to 40-80 km depending on fiber quality ()

These modules are compatible with 1G, 10G, and 25G networks, and comply with M...
