

Azerbaijan sends distribution boxes

Article Overview

Azerbaijan distributes both humanitarian aid and technical equipment, including food and medical supplies to Iran and set-top boxes to local operators like KATV1.

Humanitarian Aid Distribution

In March 2026, Azerbaijan sent humanitarian aid to Iran, consisting of food products, medical equipment, and pharmaceutical supplies aimed at supporting communities facing shortages and healthcare needs. The shipment included staple foods for households and community centers, as well as medicines and diagnostic tools to assist hospitals and clinics. The operation required careful coordination between transportation authorities, medical organizations, and relief agencies, using cargo trucks and organized distribution networks to ensure timely delivery and proper handling of temperature-sensitive items .

Commercial and Technical Distribution

Separately, Azerbaijan has also received technical distribution boxes, such as set-top boxes supplied by the Ukrainian manufacturer inext to KATV1, a leading telecommunications operator in the country. These boxes are customized with the operator's branding, including logos on the device, packaging, remote control, and user interface. The distribution of these boxes enables KATV1 to expand its service offerings and update applications via cloud services, reflecting a commercial logistics operation rather than humanitarian aid .
