

Bahama Power Distribution Box Parameters

Overview

● The product is designed into three serial numbers according to current ratings. The GGD1-type cabinet has a rated current of 1000A, the GGD2-type cabinet has a rated current of 1600A, and the GGD3-type cabinet has a rated current of up to 3150A. Designed by BAHRA, the Load Centers (LC) use the best selection of materials, cutting edge technology and class leading features to ensure safety, durability and performance. The remarkable Load Center designs are a result of an extensive effort from a team of some of the best industrial designers. The Utilities Regulation and Competition Authority ("URCA") is the independent regulator for the Electricity Sector ("ES") in The Bahamas. URCA is responsible for the licensing of all generation, transmission, distribution and supply of electricity within, into, from or through The Bahamas. Access the Bahamas Building Codes 3rd Edition outlining minimum standards for safe building. The GGD type AC low-voltage distribution panel is a technical development project issued by the former Ministry of Energy in 1992, with the premise of promoting the technological progress of China's low-voltage distribution industry and accelerating the upgrading of low-voltage distribution complete. Definitions APESL means Approved Public Electricity Supplier Licensee as defined in Section 46(1)(a)(ii) of the EA. Abnormal Circumstances means acts of force majeure where the usual operation of the electricity supplier is disrupted by factors beyond the control of the supplier such as during an. Our team is committed to continually improving reliable, efficient service to our customers. Bringing Electricity To You Grand Bahama Power has been providing electricity service since 1964.
