

Benin Steel Plant Cable Tray Specifications

Article Overview

Cable trays for the Benin Steel Plant are typically made from steel or stainless steel, designed for heavy-duty industrial use with corrosion resistance, high load capacity, and compliance with international standards.

Material and Construction

Steel and Stainless Steel: Cable trays in steel plants are generally fabricated from hot-dip galvanized steel or stainless steel (AISI 316L) to withstand high temperatures, mechanical stress, and corrosive environments typical in steel production facilities .
Stainless steel trays include chromium and molybdenum for enhanced corrosion resistance, especially in areas exposed to moisture or chemical fumes .
Aluminum and FRP Options: Aluminum trays are lightweight and corrosion-resistant, suitable for areas with moderate chemical exposure, while fiberglass reinforced plastic (FRP) trays are used in highly corrosive zones due to their non-conductive and chemical-resistant properties .

Types of Cable Trays

- **Ladder Trays:** Provide maximum ventilation and are ideal for heavy power cables. They allow heat dissipation and easy cable installation .
- **Perforated Trays:** Offer moderate ventilation and are suitable for medium-weight cables.
- **Solid Bottom Trays:** Protect cables from dust, moisture, and chemical exposure bu...
