

Brazilian Fiberglass Cable Tray Price Guide

Article Overview

Brazilian fiberglass cable trays typically range from USD 50 to USD 250 per meter, depending on load capacity, resin type, and application environment.

Overview of Pricing Factors

The price of fiberglass cable trays in Brazil varies based on several key factors:

- **Load Capacity:** Light-duty trays supporting up to 75 kg/m are generally less expensive, while heavy-duty trays supporting up to 150 kg/m cost more due to increased material and structural requirements .
- **Resin Type:** Fiberglass trays are available in Polyester, Vinyl Ester, and Phenolic resins, with Phenolic and Vinyl Ester formulations typically commanding higher prices due to superior chemical and heat resistance .
- **Tray Type and Design:** Ladder, perforated, solid-bottom, and wire mesh trays differ in manufacturing complexity. Solid-bottom or wide-span trays designed for high-capacity or long-distance installations are more expensive than standard ladder trays .
- **Environmental Application:** Trays intended for harsh environments such as offshore platforms, chemical plants, or coastal installations may include additional coatings or specialized composites, increasing costs .
- **Regional Supply and Import Costs:** Prices can vary across Brazil, with higher costs in remote regions due to logistics and import duties for international suppliers
