

CIF price of 100kW remote power supply exported from the Philippines

Article Overview

The estimated CIF price for a 100kW remote power supply from the Philippines ranges around \$97,000–\$100,000 plus shipping and insurance, depending on the destination and freight method.

Product Cost

The base cost of a 100kW off-grid solar or hybrid power system in the Philippines is approximately \$97,073 according to recent supplier listings (). This includes solar panels, batteries, inverters, and other system components. Direct manufacturer pricing is available, which avoids middleman markups ().

CIF Components

To calculate the CIF price, three main components are considered ():

- **Cost of Goods:** The manufacturing or purchase price, including packaging and handling at the origin. For a 100kW system, this is roughly \$97,000–\$100,000.
- **Insurance:** Typically calculated as a percentage of the product value, often 1–1.5% of the total cost, to cover potential damages or losses during transit.
- **Freight:** Shipping charges depend on the distance to the destination port, shipping method (container or bulk), fuel costs, and port fees. For a large system like 100kW, freight could range from \$2,000 to \$5,000 depending on the destination.
