

Cable Tray Usage Classification Diagram in Malaysia

Article Overview

Cable trays in Malaysia are classified primarily by type, load-bearing capacity, and application, with common categories including ladder, perforated, solid-bottom, basket, and channel trays.

Classification by Type and Usage

- Ladder Cable Tray
 - Open design with two side rails connected by rungs.
 - Ideal for heavy power cables and high heat dissipation.
 - Provides easy access for maintenance and cable addition .
- Perforated Cable Tray
 - Solid or trough-like base with perforations for ventilation.
 - Used for medium-weight cables and environments requiring moderate protection.
 - Can be load-bearing (trough type, 50–100mm return flange) or non-load-bearing (channel type, 15–25mm return flange) in Malaysia .
- Solid-Bottom Cable Tray
 - Fully enclosed base to protect cables from moisture, dust, or chemical exposure.
 - Suitable for sensitive instrumentation or corrosive environments .
- Basket or Wire Mesh Tray
 - Lightweight, flexible, and ideal for small control or communication cables.
 - Provides good ventilation and easy routing in complex layouts ...
