

Cable Tray and Cable Tray Classification

Article Overview

Cable trays are classified into several types, including ladder, perforated, solid-bottom, wire mesh (basket), and channel trays, each serving specific functions in electrical installations.

Types of Cable Trays

-

Ladder Cable Tray:

- Design: Resembles a ladder with two longitudinal side rails connected by rungs.
- Function: Provides excellent ventilation and heat dissipation, making it ideal for heavy-duty cables over long distances. Commonly used in industrial settings like petrochemical plants and refineries .

-

Perforated Cable Tray:

- Design: Features a flat bottom with numerous holes for ventilation and raised side rails for support.
- Function: Allows air circulation to reduce heat buildup, suitable for moderate cable loads in commercial and industrial applications .

-

Solid-Bottom Cable Tray:

- Design: Has a solid base without perforations....
