

Cable fixing inside the trapezoidal cable tray

Article Overview

Cables inside a trapezoidal cable tray can be securely fixed using binding tape, hooks, ladder, or spiral methods, depending on cable size and weight, while ensuring neatness and safety.

Common Fixing Methods

- **Binding Tape Method** Thread binding tape through the cables and secure them to the inner wall of the tray. This method is simple and effective for small to medium cables but is not recommended for very large or heavy cables .
- **Hook Fixing Method** Install hooks along the inner wall of the tray and hang the cables on them. This method is suitable for larger cables but requires additional processing to attach hooks securely .
- **Ladder Fixing Method** Arrange cables along the trapezoidal track and fix them with binding tape. This method is ideal for large cables and provides strong support, though it may require modifications to the tray structure .
- **Spiral Fixing Method** Cables are arranged along a spiral track and secured with binding tape. This method is also suitable for large cables and ensures organized routing, but it requires spiral track preparation .

Best Practices

- **Firm Fixation:** Ensure cables are tightly secured to prevent detachment or safety hazards .
- **Neat Arrangement:** Maintain tidy cable layout to avoid disorder and facilitate main...
