

Cable tray copper tape fixing

Overview

Direct fixing: gas guns and other direct fixing elements to quickly, easily and effectively anchor elements such as clamps or perforated tapes. Furse cable to tape clamps are manufactured from high quality copper alloy, providing an effective low resistance connection between tape and stranded copper conductors. Connecting cable trays correctly is essential for system safety, load stability, and long-term performance. With our many years of experience, we are one of the leading manufacturers in this field. This provides distances for cables based on their diameter and cable type. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. Cable tray may be used as the Equipment Grounding Conductor (EGC) in any installation where qualified persons will service the installed cable tray system.
