

Cable tray fabrication support price

Article Overview

The cost of cable tray supports varies widely, typically ranging from \$5 to \$100 per meter depending on material, type, and installation complexity.

Material and Tray Type Impact

The material of the cable tray is a primary cost driver. Common options include:

- **Steel (Pre-Galvanized or Hot-Dip Galvanized):** Pre-galvanized steel is the most affordable, suitable for dry indoor areas, while hot-dip galvanized steel is more expensive but ideal for outdoor or industrial environments due to corrosion resistance . Steel trays generally cost \$5-\$25 per meter .
 - **Aluminum:** Lightweight and corrosion-resistant, aluminum trays are more expensive, typically \$6-\$30 per meter, but reduce the need for heavy supports .
 - **Stainless Steel:** Highly durable and corrosion-resistant, used in harsh or hygienic environments, costing \$20-\$100 per meter .
 - **Fiberglass (FRP):** Resistant to chemicals and moisture, priced \$10-\$50 per meter, suitable for aggressive environments .
- Tray type also affects cost:
- **Ladder trays:** Open design, supports heavy cables, slightly higher cost.
 - **Wire mesh or perforated trays:** Cheaper, ideal for lighter cables and flexible installations .

Support Fabrication and Installation Costs

Cable trays require supports, brackets, and hangers to hold them in place. The fabrication and installation costs depend on:...
