

Cable tray pricing and hole drilling pricing

Article Overview

The cost of drilling holes for cable tray fixing typically ranges from \$5 to \$20 per hole, depending on material, hole size, and labor complexity.

Factors Affecting Cost

- **Material Type:** Drilling through concrete, brick, or precast elements is more expensive than drilling through drywall or light metal supports due to the need for specialized tools like diamond-tipped drill bits or core drills ().
- **Hole Size and Depth:** Larger diameter holes or deeper penetrations require more time and specialized equipment, increasing the cost ().
- **Labor and Skill:** Skilled electricians or M&E contractors may charge higher rates for precise drilling, especially when fire-rated walls or structural elements are involved ().
- **Fire Safety and Compliance:** If drilling penetrates fire-resisting walls or floors, additional sealing and fire-stopping measures are required, which adds to the overall cost ().
- **Location and Accessibility:** Ceiling-mounted or hard-to-reach areas may require scaffolding or lifts, increasing labor costs ().

Typical Cost Estimates

- Standard wall or floor penetration in commercial buildings: \$5-\$10 per hole for small to medium diameters (up to 25-30 mm).
- Concrete or reinforced walls/floors: \$10-\$20 per hole, depending on thickness and...
