

Cable tray support crossarm accessories

Overview

In addition to the covers, optional accessories in various materials and coatings are available to supplement the cable support system, e. gutter connectors, connecting plates, separating strips and protective rings. Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. Cable trays are indispensable components in modern construction and industrial environments, providing a structured and efficient way to manage and support electrical cables. The C-clamp is made of heat treated aluminum and can be installed with a Grip-All clampstick.
