

Can fiber optic cables be taken abroad

Overview

Comply with all import and export regulations and customs requirements for fibre optic cables in both the origin and destination countries. Ascertain whether any permits or licenses are required. Improve network stability and sustainability with FS. Fibre-optic Link Around the Globe (FLAG) is a 28,000-kilometre-long (17,398 mi; 15,119 nmi) fibre optic mostly- submarine communications cable that connects the United Kingdom, Japan, India, and many places in between. Over 95% of data shared internationally travels through a network of about 500 or so undersea cables, which could circle the Earth over 32 times if laid end-to-end. Every day, we send countless emails, take part in video calls, use search engines and streaming services, while seamlessly banking online.
