

Cast Shell Distribution Box

Article Overview

A Cast Shell Distribution Box is a durable, corrosion-resistant enclosure used to connect, route, and protect electrical wiring and devices in indoor or outdoor installations.

Overview

A cast shell distribution box, often made from cast metal, is designed to connect and change the direction of conduit runs, allowing branch connections and serving as a pulling fitting for electrical wiring. These boxes are suitable for both indoor and outdoor use, offering corrosion resistance, weatherproofing, and raintight/dust-tight protection when used with gasketed covers (Appleton FS and FD series) .

Key Features

- **Material and Durability:** Made from cast metal, providing high strength and impact resistance.
- **Weatherproofing:** Raintight and dust-tight when paired with appropriate covers, suitable for harsh environments.
- **Threaded Conduit Compatibility:** Accurately tapped, tapered threads allow secure connections with rigid metal conduit (RMC) or intermediate metal conduit (IMC).
- **Device Accommodation:** Can house standard flush devices such as switches and receptacles.
- **Configurations:** Available in single, two, three gang, and tandem configurations with internal grounding screws.
- **Accessories:** Covers, plugs, gaskets, and receptacles are available to complete ins...
