

Changing the password on a telecom fiber optic wireless router

Overview

Log in to your router's configuration website—the password and address should be printed on the router. Then, click the Wireless, Wi-Fi, or Network tab, locate the Security (or similar) section, type a new password into the Password or Passphrase field, then click Apply or Save. Want to change your WiFi password on a fiber internet router?

□□□□ In this video, I'll. Updating your WiFi password is more than just a hassle—it's a key step to safeguard your home network. Here's why you should consider changing it regularly: Stop Unwanted Users: Prevent strangers or neighbors from using your internet. In nearly all cases, you simply open a mobile app, tap your way through a few categories, and set your new Wi-Fi network name (s) and password (s). We're done, so now let's go get some chicken.
