

China Unicom fiber optic connection to Xiaomi router

Article Overview

You can connect a Xiaomi router to China Unicom fiber by configuring the WAN settings with your PPPoE credentials and setting up Wi-Fi through the router's web interface.

Step 1: Physical Connection

Connect your Xiaomi router to the China Unicom fiber modem using an Ethernet cable. Plug the cable from the modem's LAN port into the Xiaomi router's WAN port. Ensure both devices are powered on and the modem is connected to the fiber line .

Step 2: Access the Router Interface

Open a web browser on a device connected to the Xiaomi router via Wi-Fi or LAN. Enter the router's default IP address (commonly 192.168.31.1 for Xiaomi routers) in the address bar. Log in using the default username and password, usually found on the router label or in the manual .

Step 3: Configure WAN Settings

Navigate to the Network or Internet settings tab. Select WAN and choose PPPoE as the connection type, which is standard for China Unicom fiber. Enter your China Unicom username and password provided by the ISP. Save the settings and wait for the router to establish a connection
