

Columbia Green Complete Distribution Box Manufacturer

Article Overview

Columbia Green Technologies is the manufacturer of the Columbia Green Complete Distribution Box.

Columbia Green Technologies, a U.S.-based company, specializes in green roof systems and related components, including the Complete Distribution Box used in both intensive and extensive green roof applications . Their drain boxes are designed with a sturdy L-shaped profile and slotted walls to allow water runoff while retaining planting material or pavers for rooftop walkways . These boxes are available in square and round configurations and come in Mill or Black DuraFlex finishes, with heights customizable upon request .

Key Features

- **Material and Sustainability:** The drain boxes are made with recycled content (6% post-consumer, 49% post-industrial) and are 100% recyclable .
- **Applications:** Suitable for both intensive and extensive green roofs, they help manage stormwater, support plant health, and integrate with rooftop walkways .
- **Design:** Slotted walls allow efficient water drainage while preventing soil or granular media from entering roof drains. The boxes can accommodate various roof configurations and are compatible with Columbia Green's layered green roof system .
- **Installation:** Components should be stored in a dry area and installed according to manufacturer guidelines. The boxes are engineered for durability and ease of installation
