

Common Optical Cable Connector Models

Article Overview

The most widely used optical fiber connectors include SC, LC, ST, FC, MPO/MTP, MT-RJ, and MU, each designed for specific applications and densities.

Overview of Common Connector Models

1. SC (Subscriber Connector)

- Square-shaped with a push-pull coupling mechanism.
- Uses a 2.5 mm ferrule.
- Common in FTTH deployments, data centers, and GPON networks.
- SC/APC variants are preferred where low return loss is critical . 2. LC (Lucent Connector)

- Miniaturized version of SC with a 1.25 mm ferrule.
- Latch mechanism similar to RJ45 for secure connections.
- Ideal for high-density applications in modern data centers.
- Supports duplex and simplex configurations . 3. ST (Straight Tip)
- Bayonet-style twist-lock mechanism.
- Primarily used in legacy systems, industrial, and military networks.
- Known for robust mechanical connections but less common in modern networks . 4.

FC (Ferrule Connector)

- Threaded coupling for secure connections in high-vibration environments.
- High-precision alignment and low signal loss.
- Often used in factories, railway networks, and aviation systems . 5. MPO/MTP (Multi-Fiber Push On / Mechanical Transfer Push-On)
- Multi-fiber connectors capable of connecting multiple fibers simultaneously....
