

Comoros Networks Standard Cabinet

Article Overview

The Comoros Networks Standard Cabinet is a versatile 19-inch network cabinet designed for secure, organized, and efficient deployment of IT and networking equipment.

Key Features

Construction and Materials: The cabinet is made from high-quality cold-rolled steel with a high-strength frame, ensuring strong load-bearing capacity and durability. Side panels and doors are removable and lockable, with the option to replace the front door with a metal one for added security . **Ventilation and Cooling:** The front door features high-density mesh holes, supporting over 70% ventilation for effective heat dissipation. The roof includes perforated holes for installing 120mm fans, and the rear can accommodate double or mesh doors with forward and backward air ducts . **Compatibility and Organization:** Internally, the cabinet supports 19-inch standard equipment with adjustable U-positions. Cable trays, vertical cable racks, and brush-type cable entries help maintain organized cabling . **Mobility and Installation:** Universal casters with adjustable feet allow flexible movement and stable deployment. The cabinet can be wall-mounted or used as a floor-standing unit, with a patented easy installation method for wall mounting . **Load Capacity:** Maximum wardrobe load is 60kg, suitable for typical networking and server equipment . **Accessories Included:** Many models come with an 8-socket power bar, cooling fan, shelf, wheels, mounting hardware, square cage nuts, U-mark vertical mounting rails, and a lockable door handle . **Standards Compliance:** The cabinet meets international standards including ANSI/EIA RS-310-D, IEC297-1, IEC297-2, IEC 60297-3-100, and DIN specifications, ensuring compatibility and safety for professional IT deployment...
