

Cost of fiber optic cable installation per kilometer

Article Overview

The cost of installing fiber optic cable per kilometer typically ranges from \$40,000 to \$350,000, depending on terrain, installation method, and project complexity.

Cost Overview

The total cost of fiber optic installation per kilometer varies widely due to factors such as urban vs rural location, trenching depth, soil conditions, and right-of-way permits. For standard single-mode fiber in ducted runs, a mid-range estimate is \$120,000–\$180,000 per km, while simpler aerial installations or existing duct corridors can be closer to \$40,000 per km, and complex rural or deep-trench projects may reach \$350,000 per km .

Material Costs

Fiber optic cable material costs depend on fiber type, strand count, and construction:

- Single-mode fiber: \$0.10–\$0.50 per foot for the cable itself
- Multimode fiber: \$0.30–\$1.00 per foot
- High-count cables (e.g., 288 strands) can cost \$6 per foot or more
- Armored or outdoor-rated cables suitable for direct burial: \$0.50–\$5 per foot
