

Cost per kilometer of aerial optical cable

Article Overview

Aerial fiber optic cable installation typically costs between \$40,000 and \$180,000 per kilometer, depending on cable type, fiber count, terrain, and labor requirements.

Cost Overview

Aerial fiber optic cable installation is generally more cost-effective than underground deployment, with faster installation and lower equipment costs, though it may require more maintenance over time . The total cost per kilometer depends on several factors:

- Cable Type: Single-core, multi-core (2-144+ fibers), armored, or self-supporting ADSS cables. Higher fiber counts and armored cables increase material costs .
- Labor: Installation labor varies with route complexity, pole attachment, and splicing requirements. Typical labor rates range from \$120/hour, with total hours depending on terrain and project scale .
- Permits and Right-of-Way: Urban areas or complex rights-of-way can significantly increase costs .
- Hardware and Accessories: Pole attachment hardware, splice enclosures, and weather-resistant components add \$50-\$300 per span or location .

Typical Price Ranges

Based on industry data, aerial fiber optic cable installation costs per kilometer are approximately:...
