

Croatia s fiber optic cable upgrade

Article Overview

Croatia is undergoing a major fiber optic network expansion, combining government, state-owned, and private initiatives to provide high-speed broadband to urban and rural areas by 2026.

National Broadband Strategy

Croatia's National Plan for Broadband Development 2021-2027 aims to provide all households with download speeds of at least 100 Mbps and government offices, schools, and health facilities with symmetric 1 Gbps connections. The plan also supports the deployment of 5G networks in major cities and along highways, with EUR 130 million allocated for broadband expansion in rural areas under the Recovery and Resilience Plan . The Digital Croatia Strategy 2032 complements this by promoting digital skills and infrastructure development across the country .

State-Owned Network Upgrades

The OIV (Office for the Implementation of Digital Infrastructure) has expanded its DWDM-based fiber optic network, connecting northern and southern Croatia, including Dubrovnik, through a 44-kilometer cable section. This network supports high-speed data transmission from 2 Mbit/s to 100 Gbit/s between major cities and is used for telecommunications, multimedia, and satellite services . OIV also manages the NP-BBI Programme, targeting areas with insufficient commercial interest, ensuring reliable and secure optical infrastructure for public and commercial services
