

# DWDM Module Low Loss Warranty

## Article Overview

Low-loss DWDM modules typically come with warranties ranging from 1 to 3 years, depending on the manufacturer and product specifications.

### Warranty Overview

DWDM modules with low insertion loss are designed for high-performance optical networks, offering features such as low insertion loss, high channel isolation, and environmental stability . Manufacturers often provide warranties to ensure reliability and performance over time. For instance, GAOtek offers a 3-year warranty on their 40-channel low-loss DWDM modules with LC connectors and 100 GHz spacing, which covers defects and performance issues under normal operating conditions .

### Factors Affecting Warranty

- **Manufacturer:** Different vendors, such as Corning, Fiberdyne, and GAOtek, may offer varying warranty periods and terms .
- **Module Type:** Standard modules may have a different warranty than customized or high-channel-count modules.
- **Performance Guarantees:** Warranties often cover low insertion loss, high isolation, and temperature stability, ensuring the module maintains its optical performance throughout the warranty period .
- **Environmental Conditions:** Modules are typically tested for Telcordia GR-1209 and GR-1221 compliance, which may influence warranty coverage .
