

Dimensions of a 24-unit distribution box

Article Overview

A standard 24-way distribution box typically measures 300 mm (L) x 245 mm (W) x 85 mm (H).

Standard Indoor 24-Way Distribution Box

For indoor applications, such as the Marshal MDB-24F, the dimensions are 300 mm in length, 245 mm in width, and 85 mm in height. It features a metal body with a thickness of 1.0–1.2 mm and a fire-retardant ABS and transparent PC cover. The box is rated IP40, suitable for indoor environments, and includes a busbar for MCB connections .

Industrial or Outdoor 24-Way Distribution Box

For industrial or outdoor use, 24-way distribution boxes are often IP65 rated, providing protection against dust and water ingress. These enclosures are designed with pre-mounted double membrane seals for secure cable management. While exact dimensions may vary by manufacturer, they are generally larger than indoor boxes to accommodate additional sealing and mounting features .

Modular and Fiber Distribution Boxes

In fiber optic applications, a 24-unit modular distribution box (e.g., MDB-M24) is designed for splicing, patching, and splitting optical fibers. These boxes allow stacking to form larger configurations (MDB48, MDB96) and include removable top and bottom walls for patching between modules. Dimensions are typically optimize...
