

Dimensions of a 40-channel household electrical distribution box

Article Overview

A 40-channel household electrical distribution box typically measures around 36–40 inches in height, 14–18 inches in width, and 6–8 inches in depth, depending on manufacturer and design.

Typical Dimensions and Layout

For a residential 200A panel with 40 slots, the external dimensions generally fall within the following ranges:

- Height: 36–40 inches (approx. 900–1020 mm)
 - Width: 14–18 inches (approx. 350–460 mm)
 - Depth: 6–8 inches (approx. 150–200 mm)
- These dimensions accommodate main breaker panels with 40–42 slots, allowing space for future circuits, backup circuits, or EV charger connections . Depth is particularly important to ensure sufficient internal volume for wiring, proper spacing between breakers, and compliance with NEC wire-fill guidelines .

Installation Considerations

- Mounting: Wall-mounted panels must comply with NEC Section 110.26, requiring a working space of 30 inches wide and 36 inches deep in front of the panel, with a maximum mounting height of 2200 mm .
- Internal Layout: The usable internal space is slightly smaller than external dimensions...
