

Dimensions of cabinets for use on islands

Article Overview

Standard kitchen island cabinets are typically 24 inches deep and 36 inches high, with variations depending on storage needs, seating, and overall island size.

Standard Cabinet Sizes for Islands

- Depth: Most kitchen island base cabinets are 24 inches deep, which provides ample storage without overwhelming the space . For islands with access on both sides, two rows of 24-inch cabinets can create a 48-inch deep island .
- Height: Standard base cabinet height is 36 inches, matching typical countertop height for comfortable meal prep .
- Width: Cabinet widths vary, commonly 12, 15, 18, 24, 30, or 36 inches, depending on the storage configuration and appliances .

Special Considerations

- Seating Overhang: If the island includes seating, allow at least 15 inches of countertop overhang past the cabinet edge to provide knee space .
- Drawer vs Door Cabinets: Drawer base cabinets are preferred for islands because they provide easier access to contents without bending down, while deep drawers are ideal for bulky items and shallow drawers for smaller items .
- Multi-Depth Options: For small kitchens, mixing cabinet depths can optimize space. For larger islands, deeper cabinets or back-to-back configurations increase storage capacity .
