

Dimensions of the Integrated Outdoor Power Cabinet for the Intelligent Computing Center

Article Overview

The Integrated Outdoor Power Cabinet typically stands 91.5 inches (2324 mm) high, with width and depth customizable based on specific equipment requirements.

Standard Dimensions

For example, the Schneider Electric Integrated Power Center 2 (IPC2™), a widely used solution for intelligent computing centers, has a height of 91.5 inches (2324 mm). The width and depth are variable depending on the customer's specifications and the number of integrated components such as transformers, panelboards, and UPS systems, allowing for flexible deployment in constrained outdoor spaces (Schneider Electric) . Other outdoor integrated cabinets, such as modular sheet metal and sandwich panel enclosures, are designed to accommodate standard 1U rack-mounted equipment and can integrate power distribution, battery systems, and environmental monitoring. These cabinets are typically IP54-rated, providing protection against dust and water, and are suitable for rooftops, street sides, and other outdoor environments (Outdoor Enclosure Cabinet, Vertiv SmartCabinet ID) .

Key Features Affecting Dimensions

- Rack Units (U-space): Most cabinets support standard 19" rack installations, allowing for flexible IT equipment deployment....
