

# Distribution box sliding

## Article Overview

Sliding distribution boxes are modular, rack-mounted enclosures designed for organized fiber optic or electrical distribution, allowing easy access via pull-out or drawer mechanisms.

### Overview

Sliding distribution boxes, often used in fiber optic networks or modular power distribution, provide a secure and organized environment for splicing, terminating, and managing cables. They are typically installed in 19" racks and feature sliding or drawer mechanisms that allow technicians to pull out the box for maintenance or expansion without disconnecting the entire system .

### Key Features

- **Rack Compatibility:** Most sliding boxes fit standard 19" racks and server cabinets, with 1U or larger heights depending on capacity .
- **Fiber Capacity:** Options range from 24 to 144 fibers, accommodating LC, SC, ST, or FC adapters and pigtails .
- **Modular Design:** Many boxes allow the addition of splice trays, adapters, and pigtails according to network requirements, supporting flexible configurations .
- **Ease of Access:** Sliding or drawer mechanisms enable technicians to access splices and connectors easily, reducing downtime during maintenance or upgrades .
- **Durability:** Constructed from metal or high-quality plastics with electrostatic coatings, these boxes protect fibers from environmental factors and mechanical stress ....
