

Distribution box with Class 1 protection customized

Article Overview

Class 1 distribution boxes are explosion-proof enclosures designed for hazardous areas, fully customizable in materials, size, and internal configuration to meet ATEX, IECEx, and UL/CSA standards.

Overview

Class 1 distribution boxes are engineered for environments where flammable gases or vapors are present, such as oil refineries, chemical plants, and offshore platforms. These enclosures are designed to contain internal explosions and prevent ignition of the surrounding atmosphere, ensuring safety and compliance with international standards ().

Materials and Construction

Customizable options include:

- Stainless steel (AISI 304L or 316L) for corrosion resistance and durability in harsh environments ().
- Aluminum or cast aluminum for lightweight yet robust protection ().
- Glass fiber reinforced polyester (GRP) for chemical resistance and lightweight applications (). These materials provide mechanical strength, temperature resistance, and long-term durability, suitable for extreme outdoor conditions and industrial applications ()....
