

Dutch electrical distribution box processing

Overview

Dutch Electric has a lot of experience with designing and building switch-boxes, distribution systems and consoles. We deliver everything when it comes to panel construction. In 2003 DTC Elektro started a branch in Rotterdam, close to the fire: the port of Rotterdam. Wire and cable is a product of the first hour and we dare to call ourselves a true. TPS has been supplying experienced technical personnel from Europe for projects in the Netherlands and abroad for more than 15 years. We are now specialized in panel construction of distribution panels, distribution boxes (switchboards) and control cabinets on ships and in factories. We also work. From small boxes to large floor-standing cabinets, Panel SeT (formerly Spacial and Thalassa) electrical enclosures suit all applications in industry or infrastructures.
