

EU distribution box size

Article Overview

Standard EU distribution boxes, including Euro containers and electrical enclosures, typically range from 200×150 mm up to 800×600 mm in footprint, with heights varying by model.

Euro Containers (Industrial/Logistics)

Euro containers, also called Euroboxes or KLT boxes, are standardized stacking containers widely used in European logistics and manufacturing. They conform to the VDA 4500 standard and are designed to fit on Euro pallets (1200×800 mm) . Common base sizes include:

- 200×150 mm
 - 300×200 mm
 - 400×300 mm
 - 600×400 mm (most common full size)
 - 800×600 mm (largest full size)
- Heights vary depending on the model, typically around 147.5 mm or 280 mm, including stacking overlaps . These containers are modular, allowing different sizes and heights to be stacked securely and combined efficiently on pallets . They are usually made of polypropylene or other thermoplastics, with options for solid or ventilated walls and bases.

Electrical Distribution Boxes (Wall-Mount and Freestanding)

For electrical distribution purposes, EU wall-mounted and freestanding enclosures follow common size families rather than a single universal standard . Typical dimen...
