

El Salvador Fiber Optic Communication Cable Blowing Project

Overview

Liberty Networks will lead the construction of El Salvador's first submarine fiber-optic cable, enhancing internet capacity and resilience, and bolstering economic growth and digital services. -based digital infrastructure and enterprise connectivity provider operating across Latin America and the Caribbean, specializing in high-capacity submarine and terrestrial fiber-optic networks that support regional and international data traffic. MIAMI. Liberty Networks is to deploy a new subsea cable linking El Salvador to Panama. The Latin America and the Caribbean-focused firm this week announced it has been selected by El Salvador's telecom regulator SIGET (General Superintendence of Electricity and Telecommunications) to construct and deploy. El Salvador telecom regulator SIGET has chosen Liberty Networks to design, construct, deploy, and operate the country's first submarine cable.
