

Electrical cable pulling equipment for optical cables

Overview

A modern cable puller machine makes pulling heavy cables faster, safer, and more efficient than ever. Whether you're working on power lines, fiber optic installations, or underground infrastructure, this equipment reduces manual labor and speeds up the entire cable laying process. Thorne & Derrick International distribute the most extensive range of Cable Pulling & Cable Laying Equipment to enable the installation of low, medium and high voltage power cables into underground trench or duct – products also supplied for fibre optic blowing, subsea trenching, offshore umbilical. Modern cable pulling winches deliver precise tension control for runs exceeding 1,000 feet. These tools maintain optimal pulling forces between 900–1,500 lbs (Electrical Safety Report 2023), preventing insulation damage during long conduit installations. Due to our three-step distribution channel (manufacturer-wholesaler/distributor, end-user) we are prepared for all kinds of cable installation whether it be domestic, power or fibre optic cable installation.
