

Electrical distribution box wire fixing bracket

Article Overview

Electrical box wire fixing brackets are metal or composite supports designed to securely mount electrical boxes to walls, studs, or cable trays, ensuring stability and compliance with installation standards.

Types of Brackets

1. Adjustable Bar Brackets: These are versatile brackets that can mount 1 1/2" to 2 1/8" deep electrical boxes to metal or wood studs with varying spacing, typically 11" to 26" apart. They are UL listed and commonly used for outlet boxes in residential or commercial construction (Amazon) . 2. Wall Fixing Brackets: Designed for IP65-rated distribution boards, these brackets maintain insulation and protection levels while supporting boxes of different DIN module sizes. They often come in sets and have specified load capacities, e.g., 8-15 kg depending on the board size (Gewiss) . 3. Telescoping and Snap-On Brackets: These brackets, such as Eaton's B-Lines series, allow quick installation on studs or T-grid ceilings. They can accommodate multiple box sizes (4", 4-11/16", 5") and are adjustable to fit stud spacing from 9-1/4" to 16-1/2" (Eaton) . 4. Cable Tray or Wall Fixing Supports: Electro-zinc coated brackets are used to attach boxes or control units to wire basket trays or solid walls. They provide corrosion resistance and flexibility for single or paired installations (EZ Plated Tray Accessory) .
