

European Optical Communication Tester Manufacturer

Article Overview

Key European manufacturers of optical communication test equipment include Anritsu, Yokogawa, ESTEL, and TESAT, offering solutions for high-speed optical networks and photonic subsystem testing.

Anritsu Europe

Anritsu provides a wide range of optical test and measurement solutions, including optical sampling oscilloscopes capable of handling 1.6T 200G/lane signals. Their equipment supports next-generation networking, semiconductor testing, and quality assurance for optical and ultra high-speed electronic devices. Anritsu's solutions are designed to evaluate network performance, ensure signal integrity, and support both laboratory and field testing environments in Europe .

Yokogawa Test & Measurement

Yokogawa specializes in optical measuring instruments that capture light properties with high precision. Their products allow engineers to resolve optical spectra, track wavelength accuracy, characterize reflection and scattering, and measure optical power across wide dynamic ranges. Yokogawa also offers integrated test systems combining light sources, switches, attenuators, and optical power meters (OPMs) for comprehensive photonic subsystem evaluation .
