

Features of French Galvanized Cable Trays

Article Overview

French galvanized cable trays are available in multiple widths and heights, made from high-quality steel with hot-dip or electro-galvanized finishes, suitable for diverse construction environments.

Dimensions and Types

French cable trays, such as those from OB Profils, are offered in widths ranging from 50 mm to 600 mm and heights from 25 mm to 100 mm, accommodating various cable loads and installation requirements . They are available in multiple configurations including ladder, perforated, and solid-bottom trays, allowing flexibility for different electrical layouts and ventilation needs .

Material and Finish

The trays are primarily manufactured from steel and finished with hot-dip galvanization or electro-galvanization to ensure corrosion resistance . Other finishes include Sendzimir, Magnélis®, Zinc-Aluminium, aluminum, stainless steel, epoxy, and anti-UV PVC, making them suitable for indoor, outdoor, and industrial environments . Hot-dip galvanized trays conform to ISO 1461 standards, ensuring durability and long-term protection against rust .
