

Fiber Fusion Terminal Box 634

Overview

This 4 strand optical fiber distribution box is used for the fusion splicing, splitting, wiring transmission and other functions of the optical transmission terminal. It is a necessary equipment in network. FTTX ODN Plug and Play Fiber Access Terminal, indoor/outdoor IFDH 3000 Indoor Fiber Distribution Hub BUDI™ Fiber Optic Wall mount Enclosure, small size (1S) BUDI™ Fiber Optic Wall mount Enclosure, extra small size (2S) BUDI™ Fiber Optic Wall mount Enclosure, FOSC splicing, medium size (M) BUDI™. Suitable for the distribution frame of optical cable and optical communication equipment. Through the adapter in the distribution box, the optical signal is led out by the optical jumper to realize the optical wiring function. Fiber Optic Distribution Box (FDB) / Fiber access terminal box (FAT) / optical termination box (OTB) / Fiber termination box (FTB) / Optical Distribution box (ODB) are a compact fiber management box used for FTTH application. is widely used in FTTx cabling for both fiber cabling and cable. Suitable for SC,FC, ST,LC,duplex and simplex both available Full assembly or empty panel optional RoHS Compliant Our fiber optic terminals can be deployed below grade (in a flower pot, pull box, small or large vault), as a pedestal mount, pole mount, strand mount or within an aerial deployment.
