

Fiber Optic Cable Sheathing Price

Article Overview

Fiber optic cable sheathing typically adds \$0.10 to \$3.00 per foot to the overall cable cost, depending on material, type, and environmental rating.

Material Cost Overview

The cost of fiber optic cable sheathing varies based on the cable type, jacket material, and intended use. Single-mode fiber cables generally range from \$0.50 to \$3.00 per foot, while multi-mode cables range from \$0.10 to \$2.00 per foot, with the sheathing material contributing a significant portion of this cost. Specialty jackets, such as armored, flame-retardant, or outdoor-rated sheathing, increase the price due to enhanced durability and protection against environmental hazards.

Factors Affecting Sheathing Cost

- Indoor vs Outdoor Use: Outdoor-rated sheathing is thicker and more robust, often including UV resistance and water-blocking layers, which increases cost compared to standard indoor jackets.
- Armored vs Non-Armored: Armored cables include a metal or composite layer under the jacket for mechanical protection, adding to material and handling costs.
- Fiber Count and Cable Diameter: Higher fiber counts require larger jackets and more complex sheathing, raising the per-foot cost.
- Environmental Ratings: Flame-retardant, low-smoke, or chemical-resistant jackets are more expensive due to specialized materials and manufacturing processes.
