

Fiber Optic Cable Stripper Integrated Tool

Article Overview

Fiber optic cable stripper tools are specialized hand tools designed to safely remove the protective jackets and coatings from fiber optic cables without damaging the delicate glass core.

Purpose and Importance

Fiber optic cables are delicate, and improper stripping can cause signal loss, breakage, or scratches on the glass core. Stripper tools are engineered to provide precision, control, and safety, ensuring clean removal of jackets, buffers, and coatings while maintaining the integrity of the fiber for reliable connections .

Types of Fiber Optic Strippers

- **Tri-Hole Strippers:** Tools like the Milwaukee Tri-Hole Fiber Stripper feature multiple pre-set stripping holes for different fiber sizes, including 1.6mm–3.0mm jackets, 600–900 micron tight buffers, and 250 micron coatings. They are spring-loaded, ergonomic, and often lockable for storage .
- **Adjustable Round Cable Strippers:** Tools such as the Jonard CST-4000 allow longitudinal, spiral, and circular cuts for larger round cables (19–40mm diameter). The spring-loaded blade can rotate 90 degrees for versatile stripping .
- **Multi-Wire Strippers:** Compact, lightweight tools like the Ripley Miller 721/921 or IDEAL T® series are designed for precision stripping of multiple wire sizes and fiber jackets, protecting the core while reducing hand fatigue .
