

Fiber Optic Cable Terminal Box

Article Overview

A fiber optic cable terminal box is a compact enclosure that organizes, protects, and distributes fiber connections for residential, commercial, and industrial networks.

Overview

A fiber optic terminal box (also called a fiber optic distribution box, optical termination box, or FTTH terminal box) serves as the interface between incoming fiber cables and network endpoints. It provides a secure location for splicing, terminating, and managing fiber connections, ensuring minimal signal loss and protecting delicate fibers from environmental and mechanical damage .

Key Features

- **Port Capacity:** Available in multiple sizes, typically ranging from 2 to 48 ports, accommodating small residential setups to high-density enterprise networks .
- **Adapter Compatibility:** Supports SC, LC, FC, and ST adapters, allowing flexible connection options .
- **Mounting Options:** Can be wall-mounted, pole-mounted, or desktop-installed, suitable for indoor and outdoor environments .
- **Material and Protection:** Constructed from durable, flame-retardant PC or ABS materials with sealed housings to prevent dust, moisture, and UV damage .
- **Fiber Management:** Includes splice trays, pigtail storage, and bend radius management to maintain optical performance and simplify maintenance .
