

Fiber Optic Cable Tracing Map

Overview

FiberMap helps you track each fiber cable laid on-field along with core-level granular details. The solution captures coordinates of all active and passive network equipment on-field. FiberMap, powered by our AI engine, helps proactively diagnose and fix fiber and network. FiberMap helps you track each fiber cable laid on-field along with core-level granular details. The solution captures coordinates of all active and passive network equipment on-field. FiberMap, powered by our AI engine, helps proactively diagnose and fix fiber and network. On the Main Menu > Fiber tab, click Fiber Tracing. A Fiber Tracing pane appears and includes these tools. Zoom to Extent - This zooms and pans the map to display the trace path, start to. As simple as that, with this fiber network management software you can create fiber splice diagrams, create fiber network design, manage fiber network layout, do network mapping and planning. Use the controls at the top to play the animation or step through year by year. Plan, design, and estimate new route construction. are there some interactive maps available for keeping track of fibers in a building/cities?

I work for a small ISP and we use just old school maps, with hand written notes on maps and in notepads to monitor the fiber situation in a small city where we operate, but it is a PITA to keep track of a.
