

[illegible]

Fiber optic switches for office use in Southern Europe are available from multiple European suppliers, offering Gigabit and 10Gb options with managed and unmanaged features suitable for SMB and enterprise networks.

FS Europe offers a wide range of Gigabit and 10Gb fiber switches with advanced Layer 2 and Layer 3 features, suitable for office networks, campus environments, and SMBs. Their switches provide flexibility, scalability, and high reliability, making them ideal for converged networks and future expansion . Mouser Europe stocks a variety of fiber optic switches with detailed datasheets and pricing, allowing offices to select switches based on port count, speed, and industrial or commercial requirements . DigiKey Europe provides fiber optic switches, multiplexers, and demultiplexers with same-day shipping options, which is useful for offices needing rapid deployment . PLANET Technology specializes in managed fiber switches and media converters for Metro Ethernet and FTTx applications. Their solutions support high data rates up to 100Gbps and distances up to 120 km, with features like IPv6/IPv4 dual-stack, VLAN, QoS, multicast, and high availability. PLANET switches are particularly suitable for offices that require high-bandwidth multimedia support or integration with metro networks . Corning provides fiber optic hardware and WDM solutions for central office and headend applications. While more focused on large-scale deployments, their solutions offer high-density, flexible, and cost-effective fiber connectivity, which can be adapted for office networks requiring robust backbone connections
