

Fiber Optic Wall Panel app

Article Overview

Several apps support fiber optic wall panel management, testing, and field documentation, including WallPanel, Fiberizer Plus, and Fulcrum's Fiber Optic Cabling app.

WallPanel

WallPanel is an Android application that allows tablets to display web-based dashboards, which can be used for monitoring fiber optic wall panels or other network devices. It supports Home Assistant dashboards, security camera feeds, and remote control via MQTT or HTTP, including brightness adjustment, audio playback, and text-to-speech. WallPanel also publishes sensor data such as battery life and temperature, and supports motion or face detection for screensaver dismissal . This app is ideal for visualizing and controlling fiber panel dashboards in real-time.

Fiberizer Plus

Fiberizer Plus is an iOS app designed for fiber optic testing and analysis. It supports VeEX Fiberscopes and allows users to view OTDR traces, analyze connector end faces, and perform Pass/Fail assessments according to IEC-61300-3-35 standards. The app can save results locally or to the Fiberizer Cloud, generate test reports, and supports Optical Light Source (OLS) mode. It is optimized for iPad screens and is useful for technicians performing fiber inspections and quality assessments .
