

Fiber optic cable used as a butterfly fiber optic cable

Overview

Butterfly-shaped optical fiber cables, also known as ribbon fiber optic cables, are a type of fiber optic cable that contains multiple fibers within a single flat ribbon. Whether in data centers, home entertainment systems, or industrial machinery, these cables prove their worth. In this. Fiber-to-the-home, commonly known as FTTH, represents a modern solution for delivering high-speed internet and communication services directly to residential and commercial users. This structure houses multiple optical fibers in a single, organized unit, resembling the shape of a. Butterfly FTTH drop cable is a popular type of fiber access optical cable, according to the different application environment and laying conditions, it has reasonable design of cable structure and technical parameters. Butterfly FTTH drop cable incorporates the indoor soft cable and the.
